

I will stand in solidarity with poor farmers around the world by signing Progressio's "Say No to Terminator Technology" seedpacket and sending it to my MP but I want 20 other people to join me.

— Brie O'Keefe, Environment Campaigns Officer,  
Progressio

More details: Terminator seeds are a type of genetically modified seed that threatens farmer's livelihoods and economic independence all over the world by preventing them from saving seeds for future harvests. Progressio is fighting Terminator Technology by asking all members of the livesimply project to order seedpackets from [www.seedsaver.org.uk](http://www.seedsaver.org.uk), sign the letter inside for their MPs and then freepost it to them. Together we can prevent Terminator seeds from being made legal, but only if you take action now!

Text [promise stopterminator](tel:60022) to 60022  
(UK only) or promise at  
[promise.livesimply.org.uk/stopterminator](http://promise.livesimply.org.uk/stopterminator)

This promise closes on [1st November 2008](#).  
Thanks!

Remember, if you promote your promise to others, you'll be helping create a community action. Not only are you being the best you can be, you're encouraging others to do the same.
